IBM Internship Program

Web Development

Accelerate your journey to becoming a Web Developer by joining a learning experience with a small team and an experienced professional. Learn about coding, front end web development and design thinking, then apply your skills in a hands-on project creating an innovative, human-centered web solution to a real-world problem.

You will learn how to apply the design thinking process in web development – use strategic methods to define a problem statement, ideate creatively with your team, solve complex problems quickly, design a user experience and pitch and market your solution.

The IBM Web Development Internship Program concludes with Pitch Night where teams pitch their solutions to facilitators, stakeholders and potential employers or investors.

Key Benefits

- Opportunity to gain full time job opportunities by IBM and its network partners.
- Learn about programming and gain front end web development skills including HTML, GitHub, Javascript, CSS-Preprocessors, CSS
- Learn from online content with weekly touchpoints with a small team and industry experts.
