

GUJARAT TECHNOLOGICAL UNIVERSITY

COMPUTER ENGINEERING (SOFTWARE ENGINEERING) (02)

IMAGE PROCESSING

SUBJECT CODE: 2720208

SEMESTER: II

Type of course: Master of Engineering (Information Technology)

Prerequisite:

1. Knowledge of Fourier transform
2. Probability theory
3. Good programming skills

Rationale: This course will provide students with more techniques in the digital image processing for image enhancement as well as restoration of noisy images. Emphasis is given more on implementation of various algorithms so that students will able to develop their own algorithm. The techniques covered in the syllabus have wide applicability in any field which needs to handle the image data.

Teaching and Examination Scheme:

Teaching Scheme			Credits C	Examination Marks						Total Marks
L	T	P		Theory Marks		Practical Marks				
			ESE (E)	PA (M)	PA (V)		PA (I)			
					ESE	OEP	PA	RP		
3	2#	2	5	70	30	20	10	10	10	150

Content:

Sr. No.	Topics	Teaching Hrs.	Module Weightage
1	<u>Digital image fundamentals:</u> Light and Electromagnetic spectrum, Components of Image processing system, Image formation and digitization concepts, Neighbours of pixel adjacency connectivity, regions and boundaries, Distance measures, Applications.	6	15
2	<u>Image Enhancements:</u> In spatial domain: Basic gray level transformations, Histogram processing, Using arithmetic/Logic operations, smoothing spatial filters, Sharpening spatial filters. In Frequency domain: Introduction to the Fourier transform and frequency domain concepts, smoothing frequency-domain filters, Sharpening frequency domain filters.	12	25
3	<u>Image Restoration:</u> Various noise models, image restoration using spatial domain filtering, image restoration using frequency domain filtering, Estimating the degradation function, Inverse filtering.	06	20
4	<u>Colour Image processing:</u> Colour fundamentals, Colour models, Colour transformation, Smoothing and Sharpening, Colour segmentation.	04	05
5	<u>Wavelet and Multi-resolution processing:</u> Image pyramids, Multi-resolution expansion, wavelet transform.	04	10
6	<u>Image compression:</u>	05	05

	Introduction, Image compression model, Error-free compression, Lossy compression.		
7	<u>Morphological Image processing:</u> Preliminaries, Dilation and Erosion, Opening and Closing, Hit-or-Miss Transformation, Basic morphological algorithms for boundary extraction, Region filling, extraction of connected components, thinning and thickening.	06	15
8	<u>Image segmentation:</u> Detection of discontinuities, Edge linking and boundary detection, thresholding.	05	05

Reference Books:

- 1) Digital Image Processing, by Rafael C. Gonzalez and Richard E. Woods, Pearson Education, latest edition.
- 2) Digital Image Processing by Bhabatosh Chanda and Dwijesh Majumder, PHI
- 3) Fundamentals of Digital Image Processing by Anil K Jain, PHI
- 4) Digital Image Processing Using Matlab, Rafael C. Gonzalez and Richard E. Woods, Pearson Education

Course Outcome:

After learning the course the students should be able to:

1. Understand the basic image enhancement techniques in spatial & frequency domains
2. Understand the various kind of noise present in the image and how to restore the noisy image.
3. Understand the basic multi-resolution techniques and segmentation methods.
4. To apply this concepts for image handling in various fields.

List of Experiments:

Experiments will be based on the topics taught in the theory

Major Equipments:

Computer system with high computing power and more main memory

Open Ended Problems:

1. Enhance the given degraded image (pick up any suitable degraded image which contains letters also) such that we may be able to read the letter properly. Try to get best possible quality of image.
2. Identify type of the noise present in the image using frequency as well as in spatial domain concepts and judge the basic behavioral characteristics of the various noises.
3. Capture the real time binary photo and apply the various segmentation algorithms to identify the various objects presents in the image (i.e road, trees, river etc.)
4. Assign face recognition problem.
5. Perform the JPEG algorithm

List of Open Source Software/learning website:

MATLAB with image processing toolbox

Review Presentation (RP): The concerned faculty member shall provide the list of peer reviewed Journals and Tier-I and Tier-II Conferences relating to the subject (or relating to the area of thesis for seminar) to the students in the beginning of the semester. The same list will be uploaded on GTU website during the first

two weeks of the start of the semester. Every student or a group of students shall critically study 2 papers, integrate the details and make presentation in the last two weeks of the semester. The GTU marks entry portal will allow entry of marks only after uploading of the best 3 presentations. A unique id number will be generated only after uploading the presentations. Thereafter the entry of marks will be allowed. The best 3 presentations of each college will be uploaded on GTU website.
