Description:

The essence of Outcomes Based Education (OBE) is ensuring continuous quality improvement. In this work we present some methods being adopted to ensure continuous improvement through establishing suitable processes. The first level is at an individual course level, where in there is an attempt to improve the delivery methods or the assessment tools or the attainment of outcomes for every course being offered through the curriculum. The next level of improvement is at the program level, where in the attainment of the essential competencies of the students at the time of graduation is observed and measures for improvement arrived at. The third level of improvement is through individual faculty performance and contribution. Here, parameters like teaching, research, funded projects, content development and collaboration are explored and a format for individual self-assessment report arrived at. On an annual self-appraisal, mode, it can be ensured that every faculty progresses on an individual basis. In addition to the above processes towards continuous improvement, we include conduct a survey to observe the professional growth of our alumni and their employers, and seek suggestions for improvement. The above methods are being practiced in our department and the same is presented in this work.
