Description:

This webinar on “Research Methods for Engineers & Engineering Educators: A Primer” is a basic introduction to research methods. It includes the significance of research in engineering and in engineering education, steps involved in research, how to go about reviewing related literature, different research designs, sample selection, preliminary statistical analyses, reporting of research, a mind-map of plan and act approach, especially for engineering educators. A sample worksheet on how to deconstruct a journal article would also be presented to enable those who are new to reporting research. This would be helpful in formatting and writing journal articles in line with the expected standard of journal article publication.
