About SAL Technical Campus

The SAL Technical Campus is established under Adarsh Foundation by the enlightenment of the prominent industrialist Rajendra Shah. SAL Technical Campus is one of the top ranking institutes in India. The campus is spread in an area of 25 acres of land and is located in the Ahmedabad, the busiest city of Gujarat. The SAL Technical Campus has grown into renowned institute, offering undergraduate and post-graduate programs across diverse disciplines, such as Management, Technology, Pharmacy and Architecture. At present, there are more than 5000 students in diverse institutes .

About SAL Institute of Pharmacy

SAL Institute of Pharmacy (SALIP) was established in June 2009. The Institute is situated exactly opposite to Science city, Ahmedabad. The Institute is approved by All India council for Technical Education (AICTE) and Pharmacy Council of India (PCI). It is affiliated with Gujarat Technological University (GTU). The Institute is running B.Pharm and Pharm D course with the intake of 100 and 30 students respectively. The Institute has well equipped laboratories, furnished library with good numbers of national & international journals, classrooms, computer lab, sophisticated instruments, seminar hall, animal house and botanical garden. The college is looking forward to consolidating its position by strengthening its value to impart best education in diversified fields of Pharmacy .

About Pharm D

From current academic year SAL Institute of Pharmacy has started Pharm D program. The Pharm. D program is a professional doctor degree in pharmacy. The Pharm. D degree requires five years of classroom and hospital based study, followed by one year of internship or residency in addition to ongoing practical and research project. The Doctor of Pharmacy curriculum provides students with the scientific background and clinical skills to offer patient-centred, team-based care in an evolving health care system. It is introduced to improve clinical and hospital pharmacy services in India and it is the only pharmacy service which is in direct contact with the patient healthcare system and authorized to take critical decisions in in-patient prescription. The curriculum includes various specialized areas like clinical pharmacy, hospital and community pharmacy, pharmacotherapeutics, pharmacoepidemiology, pharmacoconomics, clinical research to name a few. After completion of this course, students can work in the areas of clinical pharmacy, hospital pharmacy, patient safety, medical writing, drug information services, public health, academic clinical pharmacy, and clinical research.

conference is attempting to discuss broad overview of (1) Importance of Regular gynecological checkups, including a pelvic exam and breast exam, Pap smear, Bone density testing, Breast cancer

Objectives: The objective of the seminar is screening, attempting discussions about colon cancer screening, Age-appropriate immunizations, Healthy lifestyle risk assessment, Hormonal testing for menopause.
