Description:

Signals and Systems is one of the fundamental courses for students from the Electronics/Electrical Science stream. It is essential to have clear concepts related to the course, as this becomes a pre-requisite for many other courses. The webinar shall commence with the course content for the course on 'Signals and Systems: Analog', and move on to typical examples related to the course, through the Multisim platform of National Instruments. Some examples to be considered are: signal addition, signal multiplication, system linearity, convolution operator, Fourier Series, Analog Filter design.

Presenter:

Dr.B.Kanmani,
Professor, ECE,
