Description:

The perspectives of innovation and partnership between industry and academics is the need of the hour, which brings together the creativity, expertise and resources, by way of converting challenges into opportunities to build a global economy. The need for strategic partnership is to be intensified to go beyond the traditional funding for discrete research projects. Indian universities to be forefront of pioneering such partnerships in order to become world-class research universities and to create engineers for tomorrow to lead the world of developed technologies. The industries and universities have to work in synchronization with each other to enhance the limits of knowledge to become a powerful engine for innovation and technological growth. A strategic approach of rich and long-lasting collaborations will give rise to new technologies at a swift pace for transformation of industries. The vital partnership will magnify the role of research with university during the coming years, anchoring it as a center of excellence to tackle social challenges and drive economic growth. The skill gap and fierce competition for global talent has to prompt industries to develop partnership with universities to inculcate outcome based education as part, to strengthen teaching and learning through skill development for global industrialised requirement.
