Description:

Case based learning is the pedagogical approach to teach the curriculum to the student in the real time environment. It facilitates effective learning and reveals the real time problem faced at the organizational level or at work place. The process of case base learning includes applicability of the curriculum knowledge to the some case and come up with the possible solution. Resource constrains present in the applying a solution to a problem will affect largely on its efficiency. Also gives the application illustration to the students of the theoretical concepts prescribed in the respective syllabus. Although case based learning gives a problem tackling and solving ideology and provides the set of solution it depends on the expertise knowledge to select the exact one.

Presenter:

Dr.Pallavi Badry
Associate Professor,
Civil Engineering Department,
VJIT, Hyderabad
